consumption control

- Decrease fuel thefts by **90%**
- Reduce fuel costs by **15%**
- Optimize fleet efficiency by **30%**

Fuel is typically one of the largest fleet expenses. Finding ways to minimize fuel spent can substantially improve the bottom line.

FiOS fuel monitoring system provides intelligent tools to keep track of fuel consumption and easily detect fuel thefts. Fuel information can be sourced from CAN-bus of a vehicle or after-market fuel sensors. Take charge of your fuel use with FiOS.

FEATURES

- Intelligent fuel consumption management
- All types of sensors support
- Dashboard to track relevant KPIs
- Integration with ERP and other back office applications
- Map markers for fuel thefts and fuel fillings

workforce management

- Probe app to optimize staff productivity
- System internal apps for KPIs monitoring
- Insight into mobile workforce locations and field operations

Let the customer separate field staff from their vehicles via a powerful tool to update work statuses, chat with the dispatcher, receive target addresses with no need for a dedicated tracking device.

Discover GPS Tag-based tracking by FiOS. Probe is a native mobile app for smartphones or tablets running on iOS or Android. It turns a mobile device into a tracker that works seamlessly with FiOS. Enjoy a great tracking solution without having to sell any hardware!

FEATURES

- Probe application to track human resources
- Route planning and monitoring
- Historical data to analyze and report
- Text communications between office and field
- Flexible order management and activities reporting tools
